

AIRCRAFT CERTIFICATION PLAN - ATA 27 FLIGHT CONTROLS

Document reference: ACP-27-CER-0114

Title: Certification plan - Flight control system architecture update

Issue: 3

Date: 12/03/2026

ATA chapter: 27

Programme: A32N-DEMO

Author: J. Fictif

Checker: M. Exemple

Approved by: C. Demonstration

Classification: DONNEES FICTIVES - POC Airbus Protect

DOCUMENT FICTIF. Contenu inventé pour démonstration outillage.

Aucune donnée de programme réel n'est utilisée.

1 Purpose

This plan defines the means of compliance retained for the flight control system modification. It is a fictitious document used to demonstrate the certification tooling prototype.

2 Applicable certification basis

The certification basis is CS-25 at Amdt 27, complemented by the special conditions and CRIs listed hereafter.

2.1 Primary requirements

The following paragraphs are applicable to the modification:

- CS 25.671 amdt 27 General, control systems. MoC: 1, 2, 3 and 6.
- CS 25.671(c)(1) specific failure conditions. MoC: 3.
- CS 25.672 Stability augmentation systems. MoC 1 / MoC 3.
- CS 25.675 Stops. MoC: 1, 4.
- CS 25.677 Trim systems. MoC: 1, 4, 6.

2.2 Development assurance requirements

The development assurance activities are covered by the following:

- CS 25.0671(a) amdt. 23, JAR 25.1301(a) ch. 11. MoC: 0.
- JAR 25.1309(a) ch. 11 as interpreted by CRI F-28 Appendix 1. MoC: 2.

2.3 Secondary requirements

- CS 25.681 Limit load static tests. MoC: 2, 4.
- CS 25.683 Operation tests. MoC 5.
- CS 25.685 Control system details. MoC: 1, 4.
- CS 25.689 Cable systems. MoC: 1, 4.
- CS 25.693 Joints. MoC: 1.

3 Systems and equipment requirements

The system safety assessment is performed in accordance with AMC 25.1309 and the associated development assurance process.

- CS 25.1309(b) Equipment, systems and installations. MoC: 2, 3, 9.
- CS 25.1309(c) failure information to the crew. MoC: 3.
- CS 25.1322 Flight crew alerting. MoC: 1, 7.
- CS 25.1301 Function and installation. MoC: 1, 9.
- AMC 25.1309 System design and analysis guidance.

3.1 Handling qualities

- CS 25.143 Controllability and manoeuvrability. MoC: 2, 6, 8.
- CS 25.703 Takeoff warning system. MoC: 1, 5, 6.

3.2 Lift and drag devices

- CS 25.697 Lift and drag device controls. MoC: 1, 5, 6.
- CS 25.699 Lift and drag device indicator. MoC: 1, 5.
- CS 25.701 Flap and slat interconnection. MoC: 1, 2, 4.

4 Special conditions and review items

The following items are opened with the Agency for this modification:

- SC F-12 Electronic flight control system protection functions.
- CRI F-01 Flight control laws validation approach.
- CRI B-14 Crew alerting philosophy for control system failures.
- ESF F-03 Equivalent safety finding on control system jamming.

5 Compliance documentation

Compliance is substantiated by the documents listed below. Each compliance demonstration is captured in a dedicated coversheet.

- DOC-27-SAF-0142 Flight control system safety assessment, Issue 2.
- DOC-27-STR-0087 Control surface load substantiation, Issue 1.
- DOC-27-TST-0203 Ground and flight test report, Issue 1.

The safety assessment results are consolidated in DOC-27-SAF-0142 chapter 4 and its sub-chapters.

6 Compliance checklist summary

Requirement	Means of compliance	Coversheet
CS 25.671	MC1 MC2 MC3 MC6	CVS-27-FCS-0001
CS 25.672	MC1 MC3	CVS-27-FCS-0002
CS 25.675	MC1 MC4	CVS-27-FCS-0003
CS 25.677	MC1 MC4 MC6	CVS-27-FCS-0004
CS 25.1309(b)	MC2 MC3 MC9	CVS-27-FCS-0005
CS 25.1322	MC1 MC7	CVS-27-FCS-0006
CS 25.143	MC2 MC6 MC8	CVS-27-FCS-0007
CS 25.703	MC1 MC5 MC6	to be issued

7 Schedule

The compliance documentation is planned for release before the Type Certification Board. Dates are fictitious.
